

WE are NIMAK ...

... and WE act sustainably:

We are the innovation & technology leader and want to achieve more with fewer resources:

- (1) Legal regulations & official stipulations
... are matters that we naturally comply with.
- (2) For us, environmental protection means
... a responsibility to society that we gladly bear.
- (3) Dealing responsibly with resources
... has a high priority in our production process.
- (4) Product life cycle
... also means quality awareness, safety and durability.
- (5) We manufacture products
... that our customers use in their production to likewise save energy.
- (6) We support our customers
... with relevant ecological requirements and issues.
- (7) Our suppliers
... are our partners who have the same demands and goals as we do!
